in return, companies get the intellectual-property rights to the solution, which is often an "intermediate" of a new drug (a substance formed in the middle stage of a series of chemical reactions).

to assure a safe working environment, the company takes a proactive approach, headed by a full-time safety director and supported by a safety committee made up of associates from all levels.

california voters are also taking up legalization

i would suggest that you call your local target store before driving to it to be sure that it is stocked.
